

Statistical measures

- ① CT
- ② Dispersion / variation
- ③ Skewness (Symmetry)

Skew function Skewness

df

Pandas

df[''].skew()

④

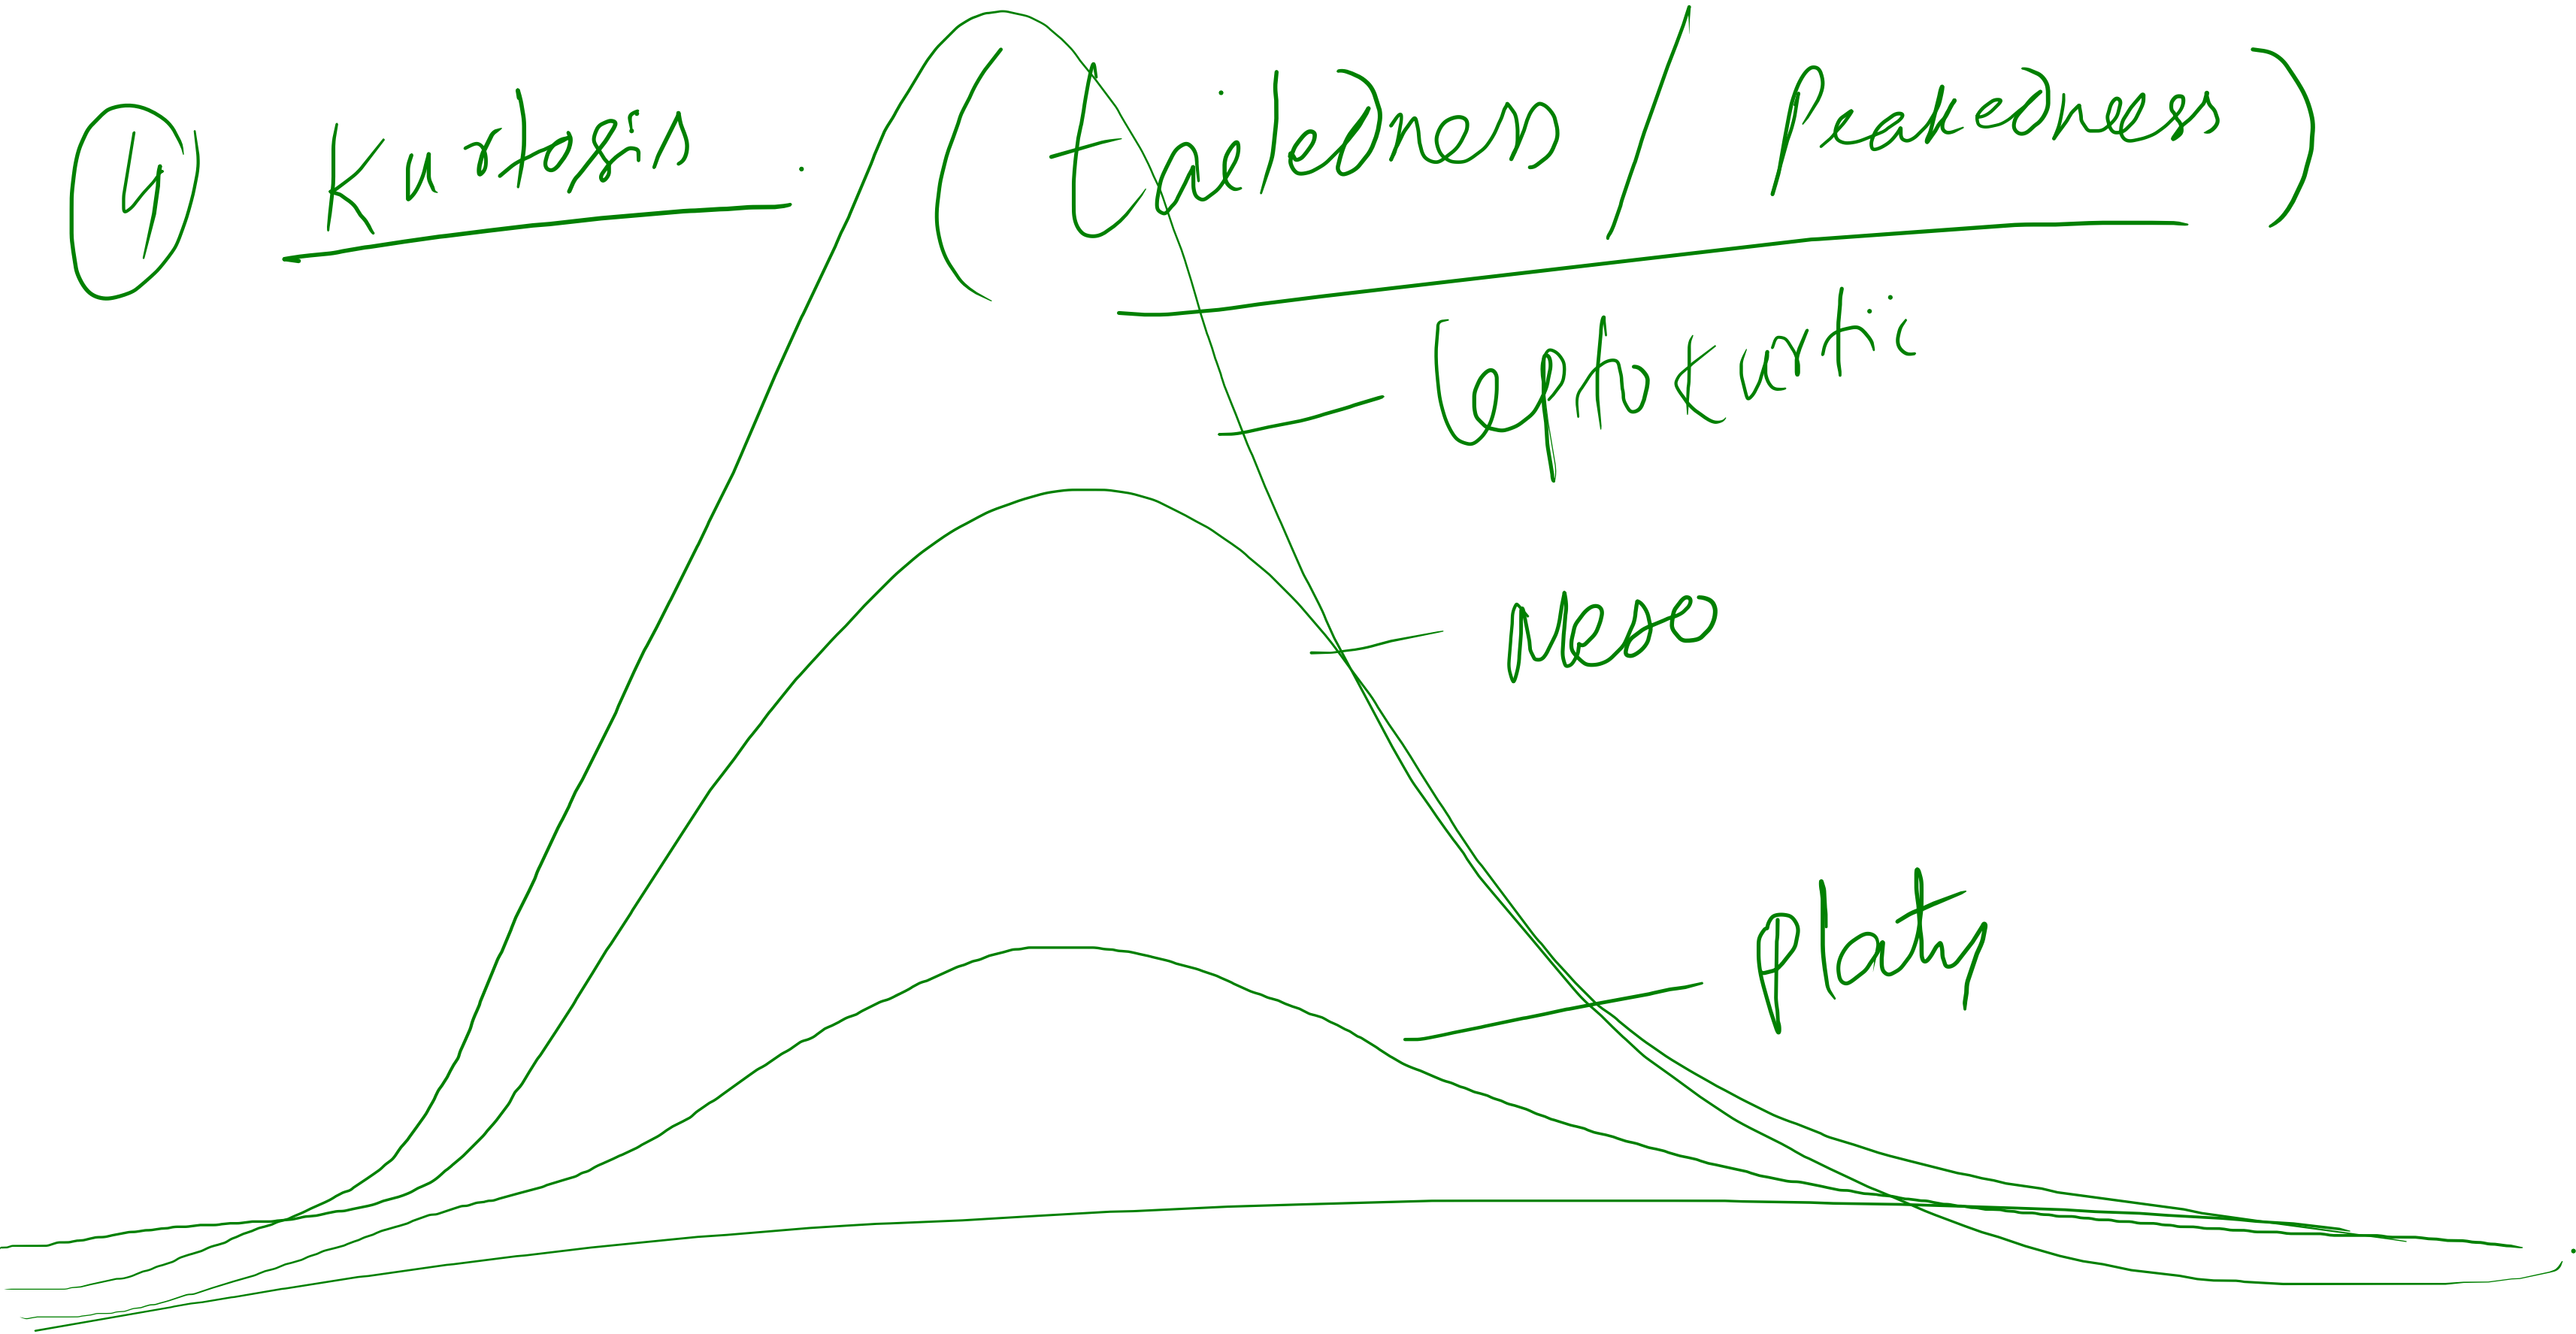

Kurtosis

(tailedness / peakedness)

leptokurtic

meso

platy

⑤

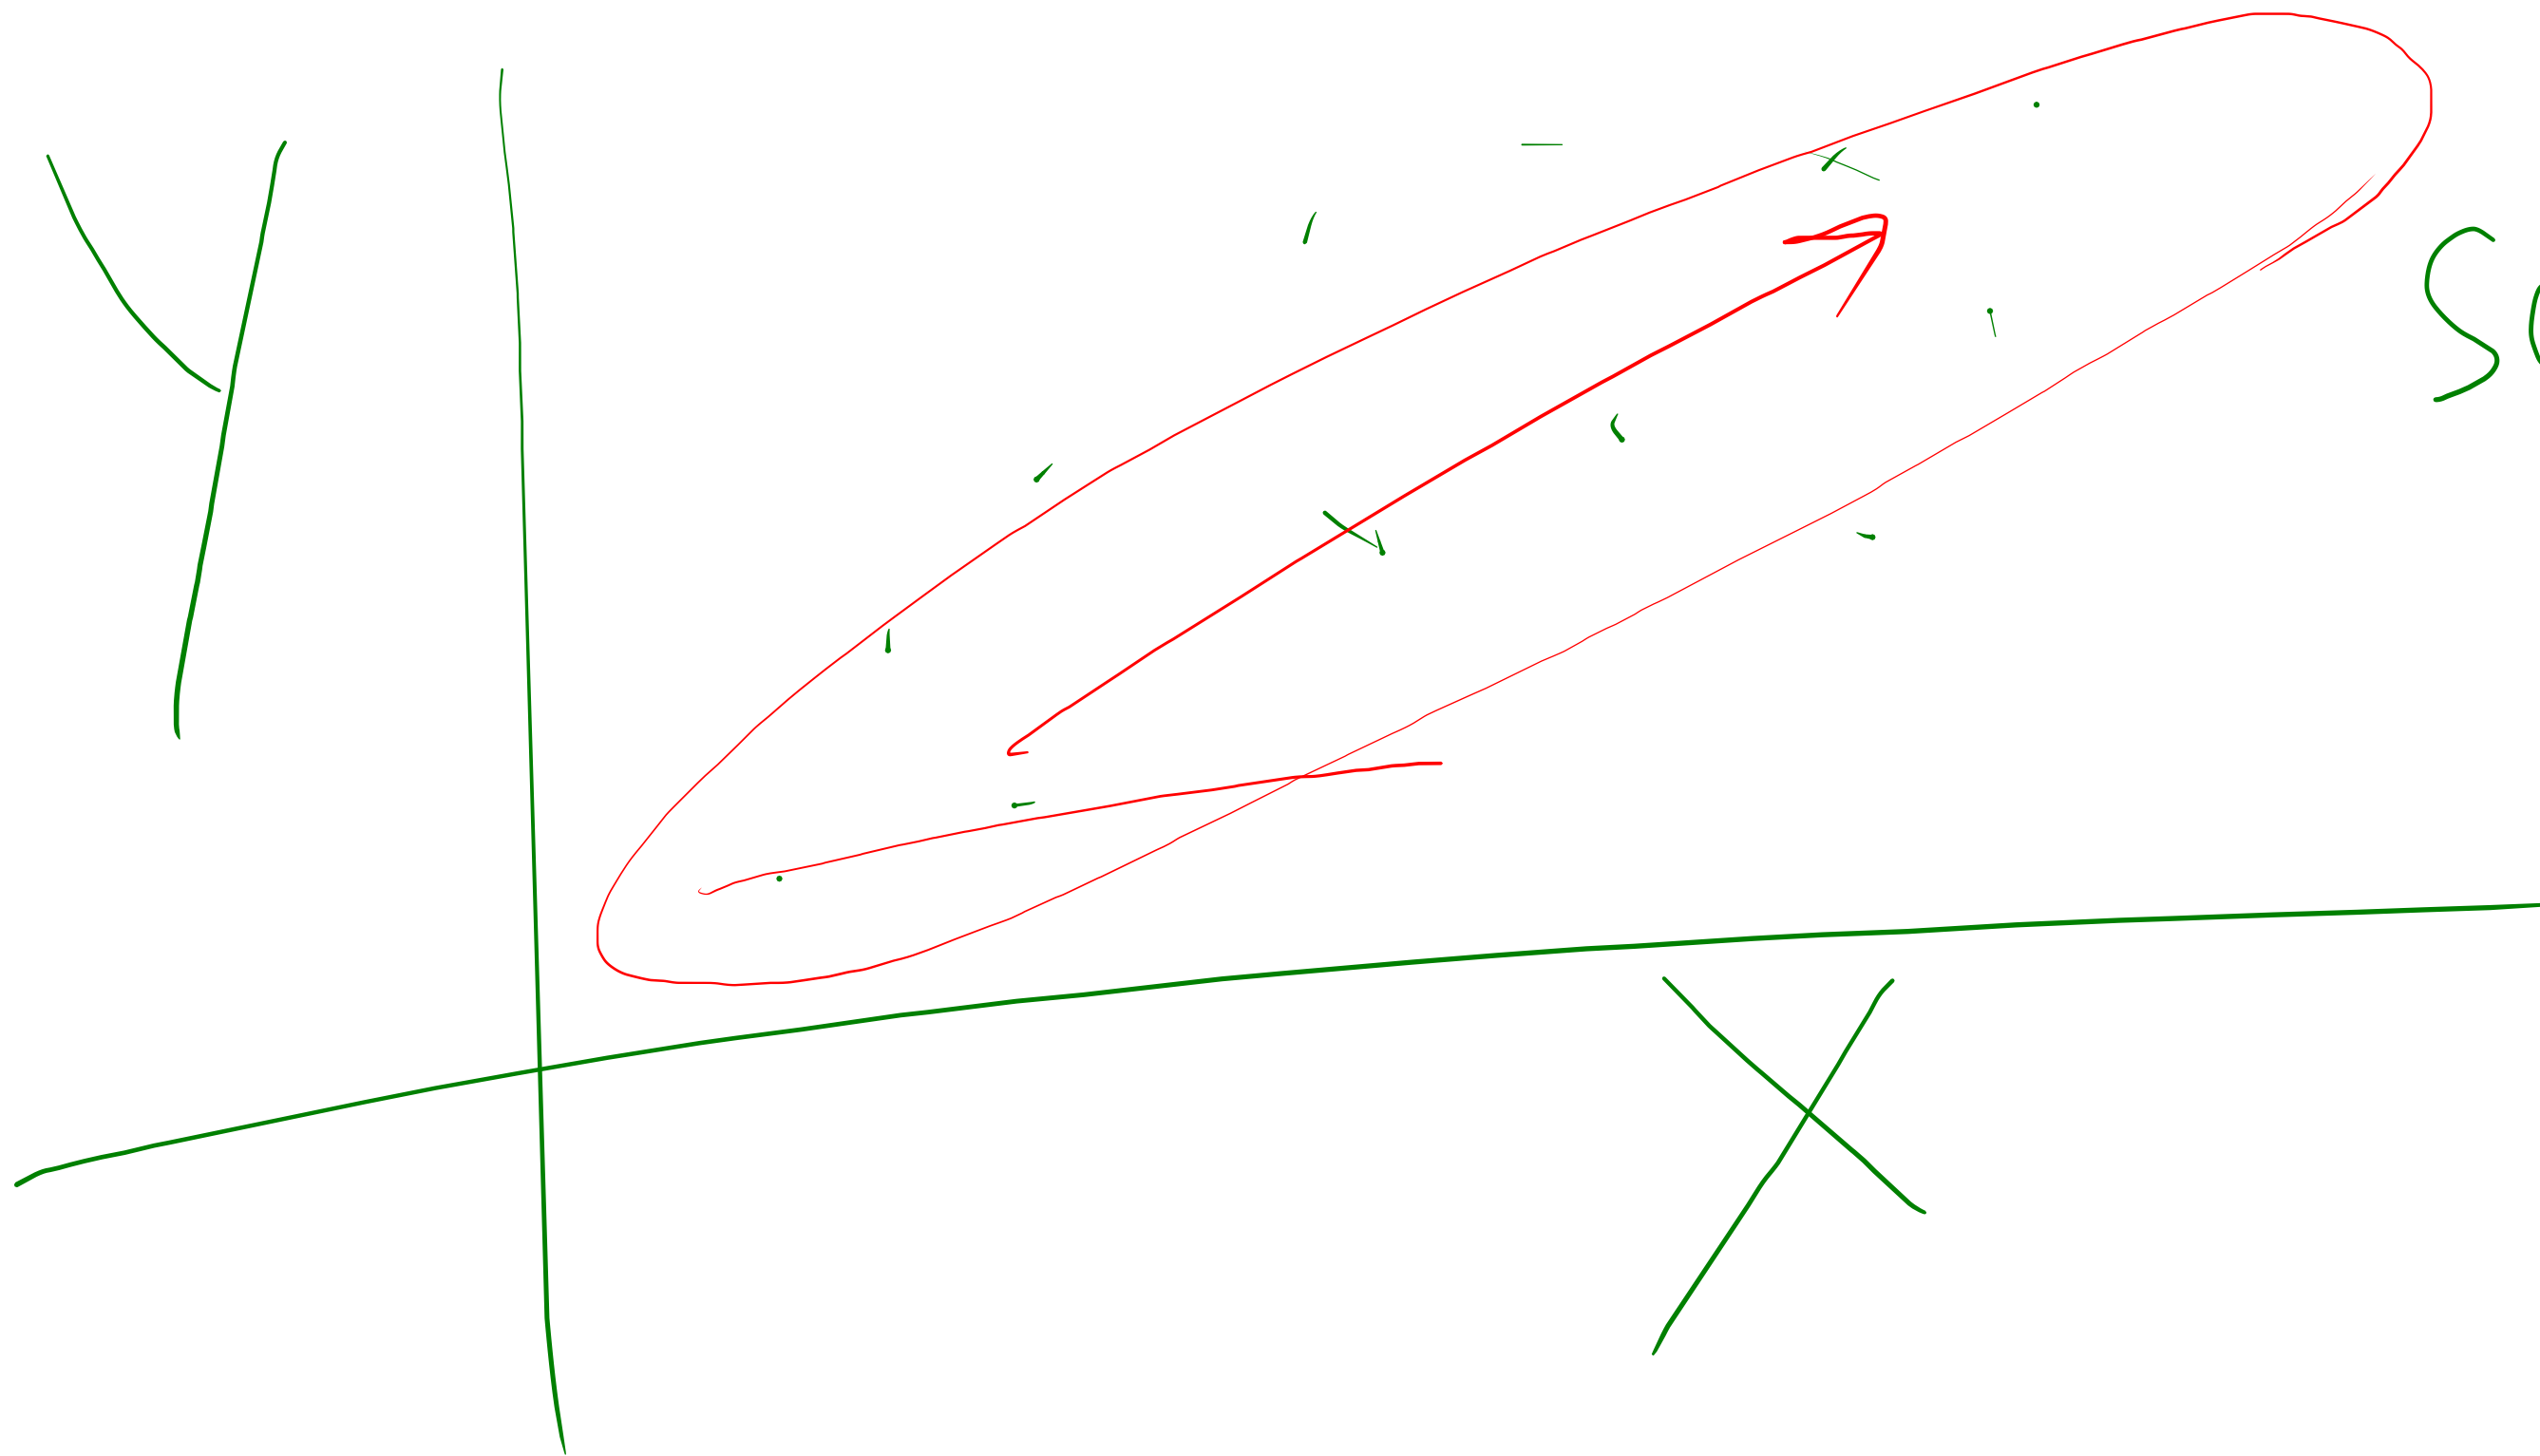

Measures of relationship / association

variables $\rightarrow X, Y$

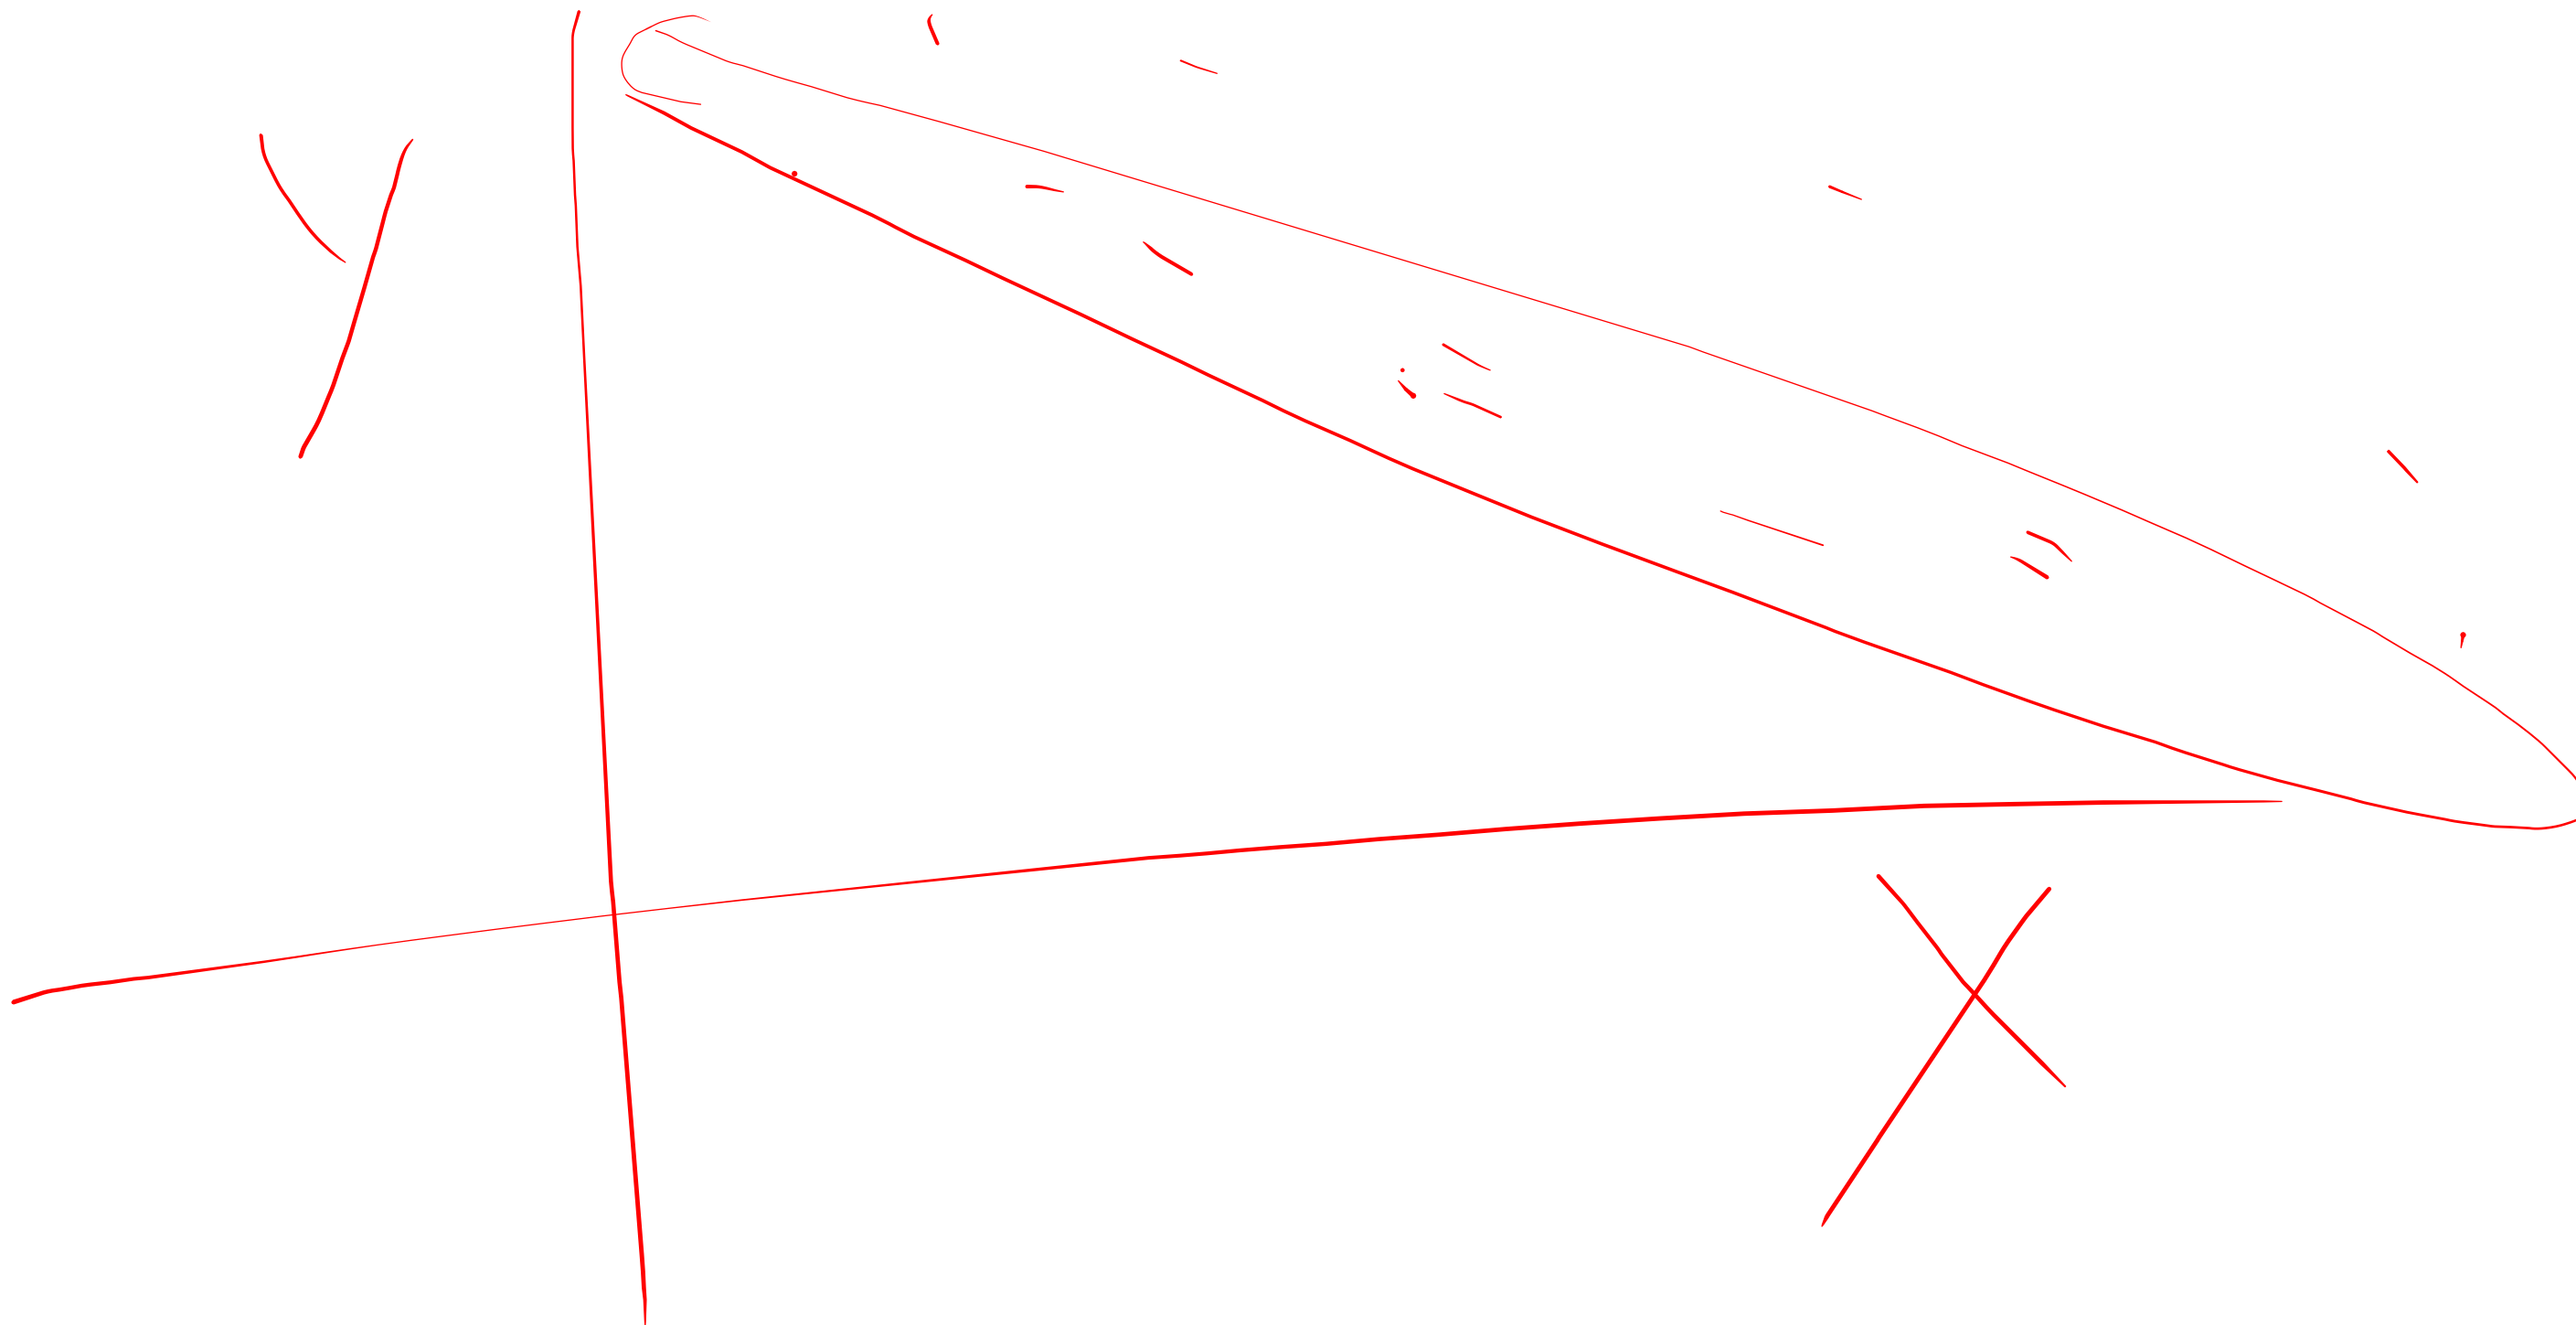

Linear relationship

Non-linear relationship

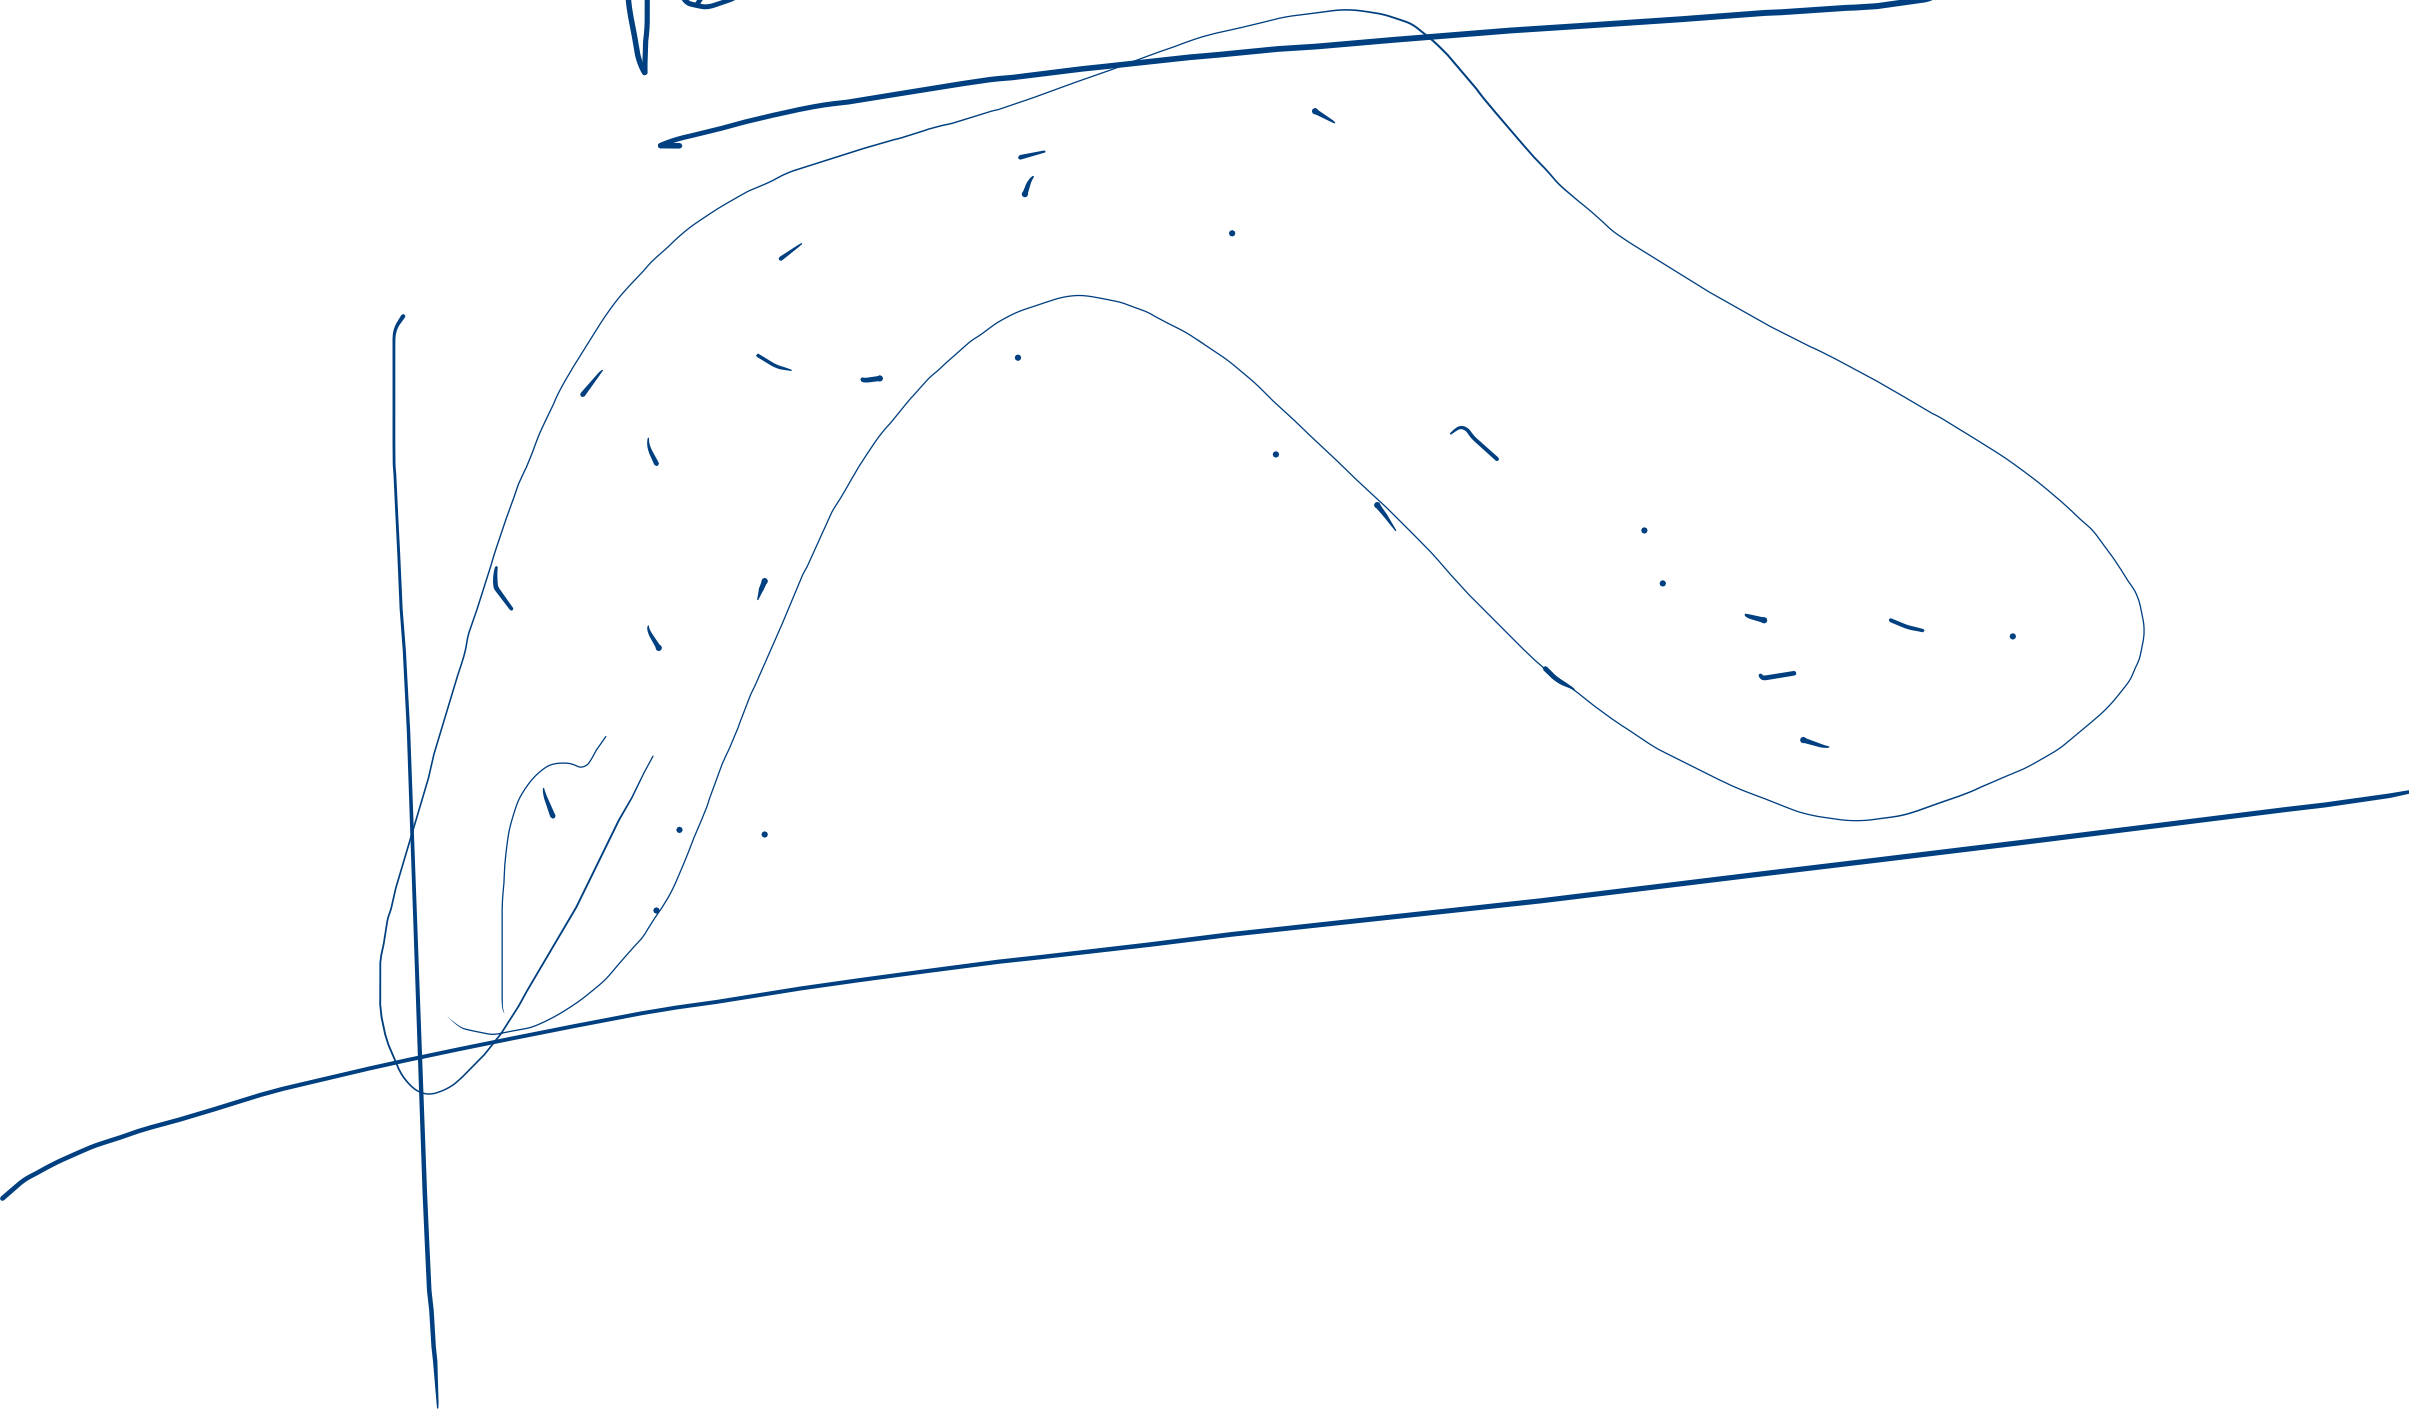

Scatter
plot

Pearson Correlation

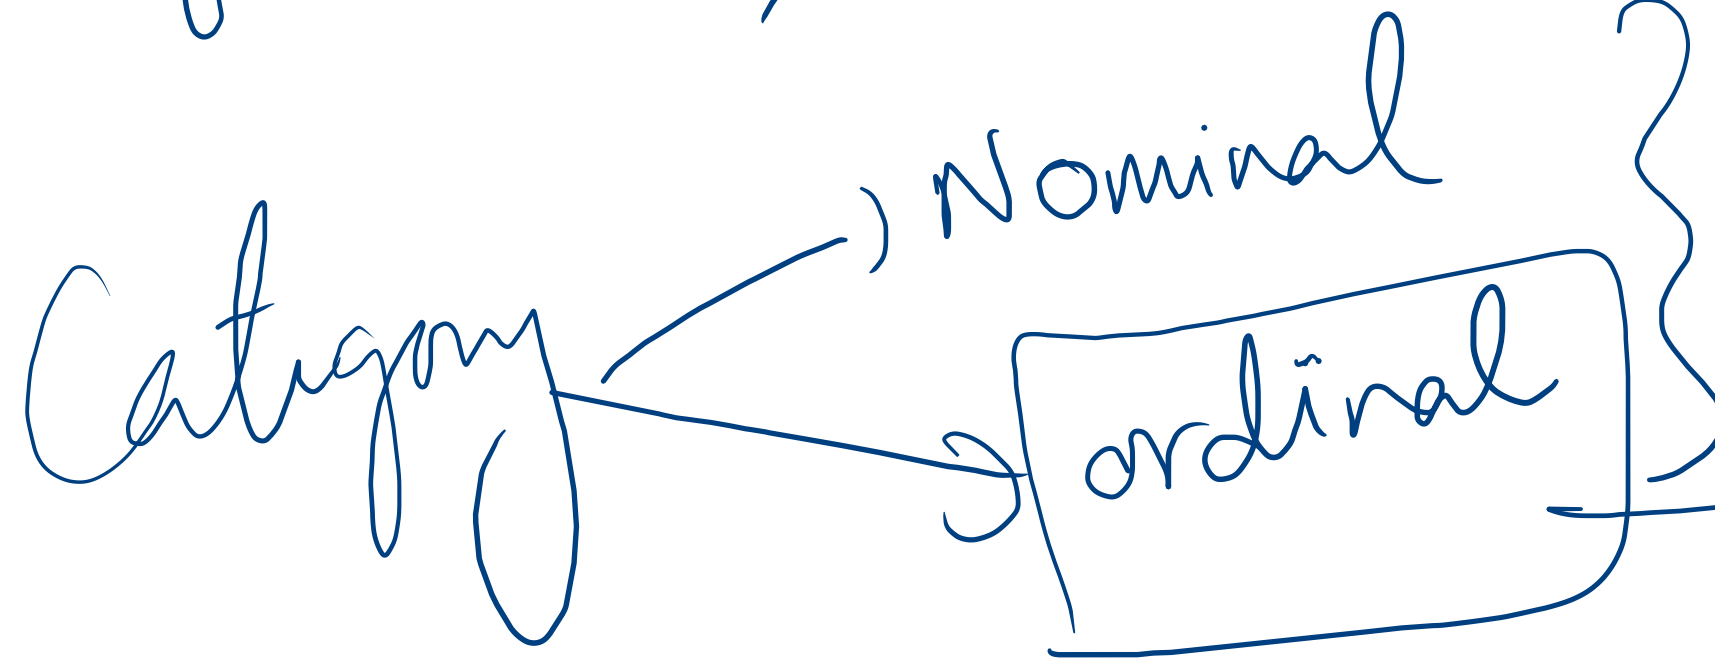

$df_{corr}()$

Interval
& ratio

Pearson r

X

Spearman r_s

Y - cts

binomial

X - binomial

binomial

point biserial
Correlation

Cramer ϕ

scipy. stats — ss

Spearman $r \rightarrow$ ss. spearmanr(x, y)

pointbiserial $\rightarrow$ ss. pointbiserialr(x, y)

Cramer's $\phi / V \rightarrow$

Cross tab

Contingency table

in statsmodels
